

Standox Express Prep Wipes U3000

Based on a special acid chemistry, Standox Express Prep Wipes U3000 are ready-to-use and will make the metal pretreatment process very fast and easy. The wipes provide both adhesion and corrosion protection for the subsequent paint process.

- Formulated for bare metal substrate preparation. Designed especially for use with VOC Xtreme Fillers U7600 and U7650.
- Fast and easy wipe-on application.
- Also suitable for small sand-through areas in combination with certain Standox VOC Fillers.
- Enable excellent adhesion and corrosion protection.
- Easy to use, no product preparation, no potlife like with mixed products.
- Economical; one wipe will work on approximately 2 m².
- Reduced flash-off times compared to 2K wash primers by about 20 - 25 minutes.
- Chromium-free, water-based and easily disposable with a very low VOC-content (less than 1.5 %).

Revolutionary pre-treatment wipe.

The Art of Refinishing.

Standex Express Prep Wipes U3000

Product preparation - application

It is strongly recommended to use appropriate personal protection equipment during application to avoid respiratory, skin and eye irritation.

Bare steel sanded and cleaned

Galvanised steel or soft aluminium sanded and cleaned.

Apply even and thoroughly in a cross wipes application method. Ensure the surface remains wet for at least 1 minute. This is necessary for an effective metal passivation.

Do only apply on bare metal areas.

The same wipe should not be used for different types of metal surfaces.

Ready to use

Not applicable

VOC Xtreme Fillers are particularly suitable.

Surface needs to be dry, overcoat within 15 minutes.

VOC compliant

2004/42/IIB(a II)(200) 14: The EU limit value for this product (product category: IIB(a II)) in ready to use form is maximum 200 g/l of VOC. The VOC content of this product in ready to use form is maximum 14 g/l.

Product mix

Mixing ratios with special agents are available in the productmix table on Standwin IQ and in the specific TDS.

Remarks

- Standox Express Prep Wipes U3000 should be protected from freezing. If the wipes are frozen, they are irreversibly damaged and cannot be used again.
- It is not recommended to use 1K primer, Wash Primer and polyester products over this product.
- Suitable personal protection equipment is recommended during application: rubber gloves are of particular importance in addition to protective work clothing and safety goggles.
- Always reseal the wipe package immediately after removing saturated wipes.
- For multiple use, wipes can be stored in a closed plastic-bag or container for maximum one working day. Used wipes should not be returned to the original container.
- If free fluid accumulates in the bottom of the wipe package roll the package horizontally to reabsorb the fluid.
- Dried out wipes must be discarded as they cannot be used or moistened again.
- The waterborne Standox Express Prep Wipes U3000 are chrome free.
- Coverage: 1 wipe/ 2m²
- Also suitable for small sand-through areas of bare metal exposed in the course of the repair process in combination with Standox VOC Pro Filler U7530 & U7530S Fast, Standox VOC System Filler U7540 and Standox VOC Xtra Filler U7560.
- It is not recommended to use 1K primer, Acid Primer, polyester products and Epoxy Primer-Surfacer over this product.

Consult Safety Data Sheet prior to use. Observe the precautionary notices displayed on the container.
